

Remote or Hybrid

Remote or hybrid?

What is the difference between the two?

Remote or hybrid?

Which one is better for you?

In remote learning the student stays home all of the time.

The student uses a computer to attend class.

The school will provide a Chromebook for the student.

The teacher uses Google Classroom to teach the class.

In hybrid learning the student goes to school some of the time.

The student attends class two days a week.

The other days the student uses a computer to attend class.

And the teacher uses Google Classroom to teach the class.

Remote or hybrid?

What is the difference between the two?

Remote or hybrid?

Which one is better for you?

Which one is better is hard to say.

But I will be happy when we all go back to school everyday.
