COMMUNITY: ENVIRONMENT – PFAS: FOREVER CHEMICALS

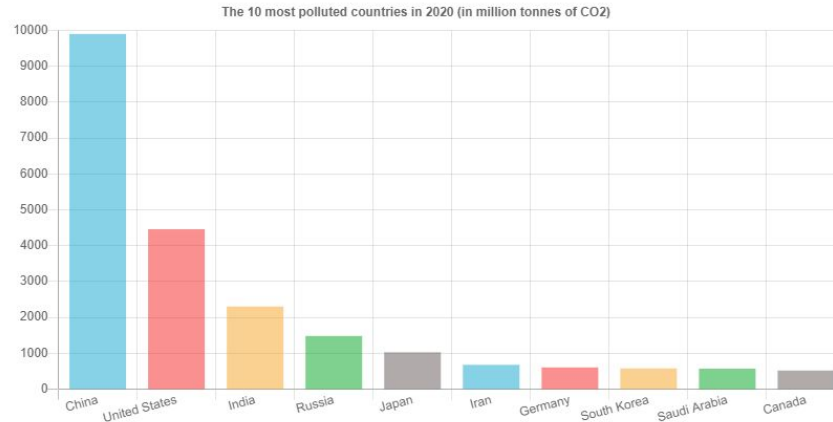

Known as “forever chemicals” because they don't break down in the environment or in our bodies, PFAS—resistant to water, grease, and heat—are found in a range of everyday products including food packaging, clothing, cosmetics, and toilet paper.

COMMUNITY: ENVIRONMENT – MOST POLLUTED COUNTRIES

Top 10 most polluting countries 2022

In 2020, global carbon emissions reached **32 billion tonnes of CO₂ in the atmosphere**, a record that is likely to be quickly overtaken, as the projected trajectory of future emissions doesn't predict any decrease.

The most densely populated and industrialised countries are therefore at the top of the list of the world's most polluted countries. The three countries with the highest CO₂ emissions are:

- 1 China with **9.9 billion tonnes of CO₂ emissions**, largely due to the export of consumer goods and its heavy reliance on coal;
- 2 The United States with **4.4 billion tonnes of CO₂ emitted**;
- 3 India with **2.3 billion tonnes of CO₂ emitted**.
